

## TABLE OF CONTENTS

1	DESIGN FOR ACTIONS IN NORMAL USE .....	18
1.1	GENERAL .....	18
1.2	REQUIREMENTS .....	18
1.3	MATERIALS .....	18
1.3.1	General .....	18
1.3.2	Material Properties .....	18
1.3.3	Material Models .....	18
1.4	ACTIONS.....	19
1.5	ANALYSIS .....	19
1.5.1	General .....	19
1.5.2	Analytical Methods .....	20
1.5.3	Models for Analysis of Structural Components .....	20
1.6	VERIFICATION OF PERFORMANCE .....	20
1.6.1	General .....	20
1.6.2	Serviceability.....	20
1.6.3	Restorability .....	21
1.6.4	Safety.....	22
1.7	EVALUATION OF PERFORMANCE .....	22
1.7.1	General .....	22
1.7.2	Evaluation Method .....	23
2	DESIGN FOR WIND ACTIONS .....	23
2.1	GENERAL .....	23
2.1.1	Scope .....	23
2.1.2	Determination of Wind Actions .....	23
2.2	REQUIREMENTS .....	23
2.3	MATERIALS .....	23
2.4	ACTIONS.....	23
2.5	ANALYSIS .....	24
2.5.1	Wind Load Evaluation .....	24
2.5.2	Wind Pressures and Loads .....	24
2.5.3	Load Combinations .....	24
2.6	VERIFICATION OF PERFORMANCE .....	24
2.6.1	General .....	24
2.6.2	Serviceability.....	25
2.6.3	Restorability .....	25
2.6.4	Safety.....	25

2.7	EVALUATION OF PERFORMANCE .....	25
2.7.1	General .....	25
2.7.2	Evaluation Method .....	25
3	DESIGN FOR SEISMIC ACTIONS .....	25
3.1	General .....	25
3.1.1	Scope .....	25
3.1.2	Basis of Design.....	25
3.2	REQUIREMENTS .....	26
3.2.1	Performance Index .....	26
3.2.2	Inherent or Possessed Performance Index.....	26
3.2.3	Required Performance Index.....	26
3.2.4	Verification of Seismic Performance .....	26
3.2.5	Evaluation of Seismic Performance Level .....	26
3.3	MATERIALS .....	26
3.4	ACTIONS.....	26
3.4.1	Levels of Earthquake.....	26
3.5	ANALYSIS .....	27
3.5.1	General .....	27
3.5.2	Analytical Methods .....	27
3.6	VERIFICATION OF PERFORMANCE .....	28
3.6.1	Serviceability.....	28
3.6.2	Restorability .....	28
3.6.3	Safety.....	28
3.7	EVALUATION OF PERFORMANCE .....	29
3.7.1	General .....	29
3.7.2	Evaluation Method .....	29
4	DESIGN FOR ENVIRONMENTAL ACTIONS.....	29
4.1	GENERAL .....	29
4.2	REQUIREMENTS .....	29
4.2.1	General .....	29
4.2.2	Durability Grade.....	29
4.2.3	Design Service Life .....	30
4.3	MATERIALS .....	30
4.3.1	General .....	30
4.3.2	Material Models .....	30
4.4	ACTIONS.....	30
4.4.1	General .....	30
4.4.2	Chloride Induced Reinforcement Corrosion .....	31

4.4.3	Carbonation .....	31
4.4.4	Frost Damage .....	31
4.4.5	Concrete Corrosion Due to Chemical Attack .....	31
4.4.6	Other Considerations .....	31
4.5	ANALYSIS .....	31
4.5.1	General .....	31
4.5.2	Deterioration Process .....	31
4.5.3	Long-Term Performance .....	32
4.6	VERIFICATION OF PERFORMANCE .....	32
4.6.1	General .....	32
4.6.2	Long-Term Performance .....	32
4.6.3	Performance under Multiple Actions from the Environment .....	33
4.7	EVALUATION OF PERFORMANCE .....	33
5	DESIGN FOR FIRE ACTIONS .....	33
5.1	GENERAL .....	33
5.1.1	Scope .....	33
5.1.2	Determination of Fire Actions .....	33
5.2	REQUIREMENTS .....	33
5.3	MATERIALS .....	34
5.4	ACTIONS .....	34
5.4.1	Small Fires .....	34
5.4.2	Moderate Fires .....	35
5.4.3	Severe Fires .....	35
5.5	ANALYSIS .....	35
5.5.1	Fire Load Evaluation .....	35
5.5.2	Factors for Burning Behavior .....	36
5.5.3	Combination with Other Design Actions .....	36
5.6	VERIFICATION OF PERFORMANCE .....	36
5.6.1	General .....	36
5.6.2	Serviceability .....	36
5.6.3	Restorability .....	36
5.6.4	Safety .....	37
5.7	EVALUATION OF PERFORMANCE .....	37
5.7.1	General .....	37
5.7.2	Methodology .....	37
